A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under Ex parte Quayle, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 03-28-03 has been entered.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 3 is rejected under 35 U.S.C. 102(b) as being anticipated by IGUCHI et al. (reference AA of the IDS filed 02-08-00). IGUCHI teaches that bacterial cellulose containing ribbon-shaped microfibrils may be formulated as a sheet in which the microfibrils are randomly intertwined, and which has a modulus of elasticity (another name for Young's modulus) of

Application/Control Number: 09/436,756

Art Unit: 1623

about 10 to 20 GPa. See column 2, lines 40-43 and column 4, lines 23-29. Example 5 at the top of column 8 teaches a specific bacterial cellulose which has a Young's modulus of 13.6 GPa. Thus, IGUCHI teaches a bacterial cellulose which comprises ribbon-shaped microfibrils, and which has a Young's modulus within the scope of the claim. The claim is therefore anticipated.

Applicant's attention is draw to the draftsperson's objections to the drawings (Form PTO 948) attached to paper number 5 mailed 05-21-01.

As indicated on the cover sheet mailed with this Office action, the Examiner has no objection to the content of the drawings. However, the drawings are considered to be informal because they fail to comply with 37 CFR 1.84(a)(1) which requires black and white drawings using India ink or its equivalent.

Photographs and color drawings are acceptable only for examination purposes unless a petition filed under 37

CFR 1.84(a)(2) or (b)(1) is granted permitting their use as formal drawings. In the event Applicant wishes to use the drawings currently on file as formal drawings, a petition must be filed for acceptance of the photographs or color drawings as

Application/Control Number: 09/436,756

Art Unit: 1623

formal drawings. Any such petition must be accompanied by the appropriate fee as set forth in 37 CFR 1.17(h) and, if filed under the provisions of 37 CFR 1.84(a)(2), an amendment to the first paragraph of the brief description of the drawings section of the specification which states:

The file of this patent contains at least one drawing executed in color. Copies of this patent with color drawing(s) will be provided by the Patent and Trademark Office upon request and payment of the necessary fee.

Color photographs will be accepted if the conditions for accepting color drawings have been satisfied. Applicant's attention is drawn to the May 1, 1998 waiver of 37 C.F.R.

1.84(b)(1)(ii) to the extent that the submission of a single set (as opposed to three sets) of black and white photographs will be considered acceptable upon the filing of a petition under 37 C.F.R. 1.84(b)(1). If color photographs are submitted, three sets are still required.

The claim is not allowed.

Papers relating to this application may be submitted to Technology Center 1600 by facsimile transmission. The number of the fax machine for official papers in Technology Center 1600 is (703) 308-4556. Any document submitted by facsimile
